1. Fix problem with Database: Check attached file

2. Be able to move the position of the films in this particular section. I mean being able to move up and down so I can decide what part of the image do I see there. (https://brunovalenti.net/es/projects/films/)

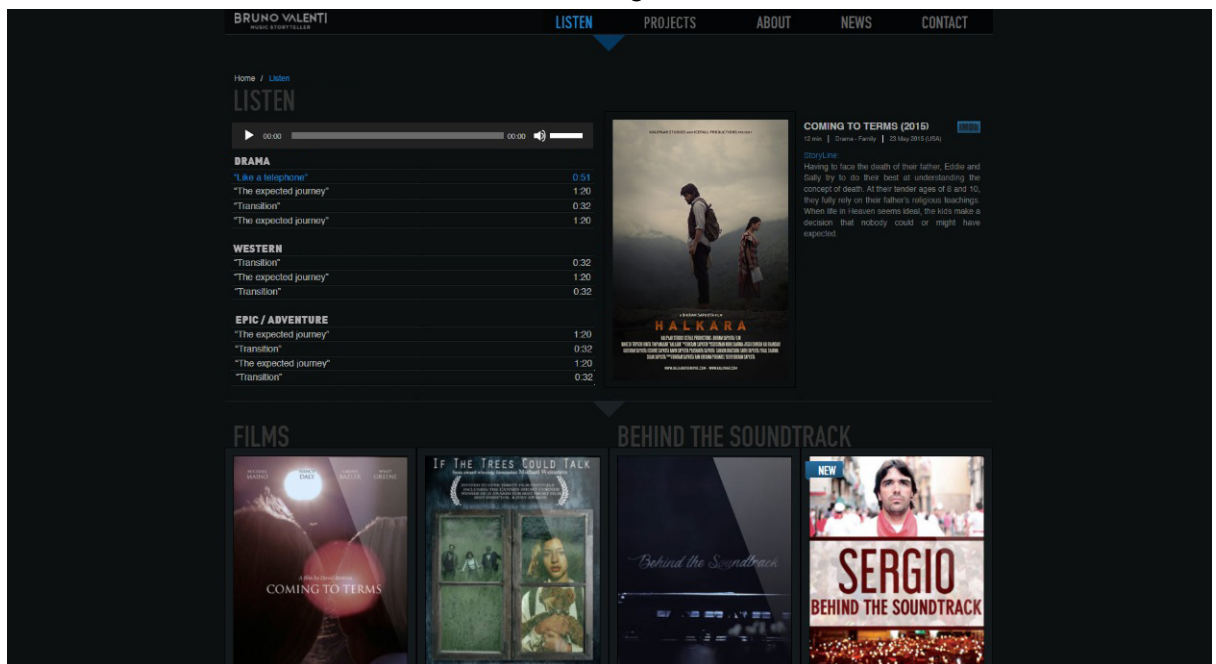

3. Be able to automatically play a video here when you enter in the website (It have to be an option to switch between the current slider and the video playback from the

wp-admin.)

4. Add a new button called LISTEN / MUSICA that goes to this:

(It would be great if that button can be hidden or shown from the wp-admin.)

In this section we will have a player with playlists separated by genres. On the right, we will see a picture that belongs to what we are listening as well as a description text of each track.

5. Make the NEWS button hidden/shown from the WP-admin
